

ERASMUS+ RESEARCH HUB

Brief information on the LTA

Project Partners

NA Partners:

BE02
CZ01
DE01
DE02
EE01
FR01
PL01
TR01
NL01
HU01?
FI01?

Strategic Partners:

RAY/FI01
SALTO DIGI/FI01
SALTO ET/HU01
SALTO GREEN/FR01
SALTO Inclusion/HR01
SALTO PI/EE01
SALTO YOU TC/DE04?

What is ERH+?

No primary data collection

Embracing the chaos

Aimed at sharing rather than producing

Cross-sectoral networking and cooperation

Focus on results and recommendations based on studies conducted by NAs and experiences from TCA

Structuring knowledge on processes, priorities, sectors, key actions, etc. of Erasmus+

Sharing of good (and bad?) practices on methodology and data collection

Complementary (not competitive!!!) to other LTAs/ research activities

CONNECTING THE DOTS AND SEEKING SYNERGIES

mutual strenghtening of evidence on E+

What is the goal of the LTA?

The main goal of the Erasmus+ Research Hub is **to create a transnational research network and a structured, comparable evidence ecosystem for Erasmus+ research across Europe**. The initiative focuses on:

- **Harmonising research practices** within the NA network, ensuring methodological coherence and improving comparability of studies across countries and sectors.
- **Supporting evidence-informed decision-making at national and European levels**, by synthesising findings, identifying trends and making insights easily accessible to practitioners policymakers and researchers.
- **Developing an online platform and an AI-based tool** that will enable fast, user-friendly retrieval of evidence, findings and recommendations (the launch planned for 2026–2027).

Added-value for the Partners

- **Participation in an international research network** involving 10+ National Agencies, SALTO Resource Centres, the RAY Network and the European Commission.
- **Support in harmonising research approaches and peer learning** – participation in the network provides access to methodologies, tools and outcomes developed and validated by other NAs.
- **Involvement in co-creating the online platform and the forthcoming AI-based conversational assistant** (scheduled for 2026–2027) . The AI chatbot will be trained, among others, on the results provided by partners through the excell templates, giving each partner NA access to a tool that can retrieve and summarize findings from studies conducted across the network – including those produced by the NA itself.
- Increased **visibility of the NA's research outputs** at European level.

Timeline

List of anticipated network tasks/activities:	2024		2025				2026				2027			
	q3	q4	q1	q2	q3	q4	q1	q2	q3	q4	q1	q2	q3	q4
Setting up cooperation between partners														
Joint agreement														
Development of tools and working methods														
Evaluation of tools and working methods														
Evidence collection – sharing results, recommendations, good practices collected by NAs, e.g. with the use of a standardized form (2 iterations/year)														
Evidence analysis – in-depth analysis of data collected, insights, connecting the dots (2 iterations/year)														
Development of E+ RH online platform & AI tool														

Operational level

**Accumulating Knowledge
about Erasmus+**

**„WHAT DO WE KNOW
ABOUT...?“**

(e.g., digitalization, inclusion, students'
attitudes, the ADU sector, the impact of E+
on schools, our countries, etc.)

Necessary steps:

Resources review

**„WHERE DOES OUR
KNOWLEDGE COME FROM?“**

It is essential to review our resources:
What do we have? What are the available
sources, studies, and insights about the
functioning of Erasmus+?

Metadata description

**„HOW DID WE COLLECT DATA
AND INFORMATION?“**

(including the studies and analyses that
served as the foundation)
